

## Bree Collaborative Implementation Survey Results | Hospitals Oncology Care

This report summarizes adoption of the Bree Collaborative’s Oncology Care Recommendations, completed by Washington State hospitals in 2016. We measured adoption of specific recommendations using 0-3 point scale, self-assessed by each hospital.

### **Results: 6 Hospitals Responding**

**0** -No action taken; **1** -Actively considering adoption; **2** -Some/similar adoption; **3** -Full adoption

	<b>AVERAGE SCORE</b>
The American Society of Clinical Oncology’s (ASCO) Choosing Wisely recommendations are followed including:	
PET [positron emission tomography], CT [computed tomography] and radionuclide bone scans are not used in the staging of early prostate cancer at low risk of spreading	1.50
PET, CT, and radionuclide bone scans are not used in the staging of early breast cancer that is at low risk of spreading	1.50
Palliative care is offered alongside active anti-cancer care, as needed	2.67
Oncology care is aligned with a patient’s individual goals and values and follows the American Society of Clinical Oncology’s (ASCO) position statement of key elements for individualized cancer care	2.67
Patients are apprised of the harms, benefits, evidence, and potential impact of chemotherapy, radiation, molecular therapy, immunotherapy, and surgery at all stages in their illness trajectory	2.33
Goals of treatment are discussed at beginning of treatment	1.67

### **Scale**

We measured adoption of specific recommendations using 0-3 point scale, self-assessed by each hospital.

0 - No action taken	<ul style="list-style-type: none"> <li>• No leadership awareness of Bree Collaborative Topics</li> <li>• No team formed</li> </ul>
1 - Actively considering adoption	<ul style="list-style-type: none"> <li>• Bree topics, aims and components have been discussed</li> <li>• Education, assessment, information gathering</li> <li>• Changes planned but not tested</li> <li>• Information gathering and baseline measurement begun</li> </ul>
2 - Some/similar adoption	<ul style="list-style-type: none"> <li>• Initial test cycles completed for more than one element</li> <li>• Quality metrics and data available demonstrating adoption/effectiveness</li> <li>• Other similar (Bree-like) changes adopted for this topic</li> </ul>
3 - Full adoption	<ul style="list-style-type: none"> <li>• Changes implemented in all areas</li> <li>• All components integrated into care process (i.e. orders, etc.)</li> <li>• Partial or complete closure of gap between baseline &amp; target outcomes</li> </ul>
